## **DecoGlide™ – Australian Breakthrough in Window Dressing Design**

Windows will never look the same again after the launch this month of the new Australian design innovation - the DecoGlide™.

Featuring intricately detailed laser-cut panels on a gliding track, DecoGlide™ replaces traditional blinds and curtains with delicate patterns and stylized imagery - delivering that all important visual 'wow' factor, as well as essential privacy and shade.

DecoGlide™ was created by Architect, Meriam Salama, and Marianne Sourial, founders of Melbourne design consultancy, Twenty Six Letters.

“Through my work in architecture, I saw a gap in the market for a window product that was well designed, simple to install, easy to maintain but also added style and ambiance to a room,” Meriam said.

“Why just settle with functional window coverings when you can have a signature statement that is both beautiful and practical,” she said.

Beautifully detailed, the different screen designs filter sunlight to cast continually changing patterns across a room. Meriam describes the screens as ‘more like a piece of art than a blind’.

“The DecoGlide™ provides the practicalities of sun and heat protection, as well as screening unwanted views and providing privacy. The screens transform potentially difficult or unsavory spaces into something appealing and joyful,” Meriam said.

The DecoGlide™ screens are made of timber plywood, acrylic or industrial felt and come in a wide range of colours, making them suitable for all styles of homes and workplaces. The architectural design is evidenced in the DecoGlide’s simple and refined tracking system which ensures the screens glide smoothly.

A simple online ordering system allows people to order a custom-made DecoGlide™ screen system quickly and easily. The screens are designed to order, delivered to the door and do not require a tradesperson for installation.

The DecoGlide™ costs between \$96.60 and \$455 per square metre, depending on the material used and the design chosen.

“The DecoGlide™ is much more than just a window treatment; we designed it to enliven and enrich the quality of any room,” Meriam said.

Custom DecoGlide™ screens can also be commissioned from Twenty Six Letters for residential and commercial projects.
